for Aesthetic and Hair Applications

Two Specialized Formulations

3 Billion Exosomes

- Formulated for topical facial aesthetic applications
- For licensed professional use only

6 Billion Exosomes

- Formulated for topical scalp and hair applications
- For licensed professional use only

Why Wharton's Jelly?

Wharton's Jelly is the protective connective tissue surrounding blood vessels in the umbilical cord, naturally rich in proteins, growth factors, and cytokines. Factor EX Exosomes and Exosomes PRO are characterized by proteomic analysis (LC-MS/MS) to document a diverse array of functional proteins and peptides, including growth factors and cytokines. Produced from cell populations that are at least 95% pure.

Ambient Storage | **Ready to Use** | **Two-Year Shelf Life** | **Terminally Sterilized**

This product is intended for cosmetic and/or research use only. These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease. For topical, professional use only.

FACTOR EX EXOSOMES

Topical Facial Aesthetic Applications

FACTOR EX EXOSOMES PRO™

Topical Scalp & Hair Applications

Dedication to Quality

Our exosome products are rigorously characterized to ensure consistent, reproducible quality. Each lot undergoes:

- Proteomic Testing to identify functional proteins, peptides, growth factors, and cytokines.
- Nanoparticle Tracking Analysis to verify size and concentration of exosome particles.

Commitment to Processing & Safety

Factor Ex Exosomes undergo stringent processing and safety testing. Manufacturing is carried out in a cGMP laboratory using ISO Class 5 biosafety cabinets within an ISO Class 7 clean room.

Stringent Donor Selection

Procured from umbilical cord tissue of healthy mothers who donated birth tissue after delivery.

Donors are extensively screened for medical history and social behaviors affecting tissue safety.

Product Attributes

Feature	Factor EX
Source	Wharton's Jelly (Umbilical cord)
Storage	Shelf-stable (ambient)
Preparation	Ready to use
Standards	Manufactured in a cGMP, ISO-classified facility
